

CYCLOPS

AUTOMATIC SCHOOL BELL

Importance & Benefits

- Ensures Punctuality: Minimizes delays and disruptions, promoting a disciplined and efficient environment.
- Reduces Manual Effort: Frees up staff from the repetitive task of ringing bells, allowing them to focus on more critical duties.
- Enhances Safety: Can be programmed for emergency alerts, providing a quick and reliable way to notify personnel of critical situations.

Automate Your Schedule.
Optimize Your Operations.

THE FUTURE OF TIME MANAGEMENT
INTRODUCING THE CYCLOPS
AUTOMATIC SCHOOL BELL

ELIMINATE MANUAL ERRORS. EMBRACE AUTOMATION

- In today's fast-paced environment, punctuality and precision are non-negotiable. The traditional, manually operated bell system is prone to human error, leading to disruptions and lost time.
- The CYCLOPS Automatic School Bell is a state-of-the-art solution designed to replace outdated methods with a fully automated, reliable system. It ensures that every period, break, and emergency alert is announced with perfect timing, every time.
- This system is more than just a bell; it is a commitment to efficiency and a foundation for a well-structured and disciplined environment.

WHERE PRECISION MEETS PERFORMANCE

KEY FEATURES

- **Pre-programmed Schedules:** The system is pre-programmed with your specific timetable, ensuring a smooth and hands-free operation from day one.
- **Automated and Accurate:** It eliminates the need for manual intervention, providing 100% accuracy in ringing bells at the designated times.
- **Customizable & Flexible:** Easily adjust the schedule for holidays, exam periods, and special events.
- **Multi-Application Capability:** Versatile enough to be used in various settings, including schools, colleges, and factories.
- **Durable & Reliable:** Built with high-quality components to ensure long-term, consistent performance.

Applications:

- **Schools & Colleges:** Automates class period changes, break times, and end-of-day signals.
- **Training Centers & Universities:** Manages lecture timings and ensures efficient transitions between sessions.
- **Factories & Workplaces:** Ideal for signaling shift changes, lunch breaks, and emergency alerts, improving workflow and safety.

HOW IT WORKS

- **Microcontroller / Timer System:** At its core, our system uses an advanced microcontroller to operate with exceptional accuracy.
- **Electric Bell / Siren:** The system can be seamlessly connected to your existing electric bells or sirens for immediate and effective alerts.
- **User-Friendly LCD Interface:** The intuitive LCD allows for easy programming and modifications, giving you complete control over your schedule without the need for a computer.
